1. Structure of Farm Households by Size of Cultivated Land

The area of cultivated land under the management of farm households has been on the decrease since 1960. As the size of the decrease in the number of farm households exceeds the percentage of the decrease in the area of cultivated land under the management of farm households, the average area of cultivated land per farm household has increased - i.e., 6.86 ha. in 1960, 10.61 ha. in 1965, and 8.96 ha. in 1970.

The greatest feature of the increase and decrease in the number of farm households since 1933 is classified by size of cultivated land under management. The average size of farms has been on the decrease since 1957, the average size of farms has decreased in number to 8.26 ha. in 1960, 5.63 ha. in 1965, and 4.76 ha. in 1970.

The area of cultivated land under the management of farm households has been on the decrease since 1960. As the size of the decrease in the number of farm households exceeds the percentage of the decrease in the area of cultivated land under the management of farm households, the average area of cultivated land per farm household has increased - i.e., 6.86 ha. in 1960, 10.61 ha. in 1965, and 8.96 ha. in 1970.

1. Structure of Farm Households by Size of Cultivated Land

The area of cultivated land under the management of farm households has been on the decrease since 1960. As the size of the decrease in the number of farm households exceeds the percentage of the decrease in the area of cultivated land under the management of farm households, the average area of cultivated land per farm household has increased - i.e., 6.86 ha. in 1960, 10.61 ha. in 1965, and 8.96 ha. in 1970.

1. Structure of Farm Households by Size of Cultivated Land

The area of cultivated land under the management of farm households has been on the decrease since 1960. As the size of the decrease in the number of farm households exceeds the percentage of the decrease in the area of cultivated land under the management of farm households, the average area of cultivated land per farm household has increased - i.e., 6.86 ha. in 1960, 10.61 ha. in 1965, and 8.96 ha. in 1970.

1. Structure of Farm Households by Size of Cultivated Land

The area of cultivated land under the management of farm households has been on the decrease since 1960. As the size of the decrease in the number of farm households exceeds the percentage of the decrease in the area of cultivated land under the management of farm households, the average area of cultivated land per farm household has increased - i.e., 6.86 ha. in 1960, 10.61 ha. in 1965, and 8.96 ha. in 1970.

1. Structure of Farm Households by Size of Cultivated Land

The area of cultivated land under the management of farm households has been on the decrease since 1960. As the size of the decrease in the number of farm households exceeds the percentage of the decrease in the area of cultivated land under the management of farm households, the average area of cultivated land per farm household has increased - i.e., 6.86 ha. in 1960, 10.61 ha. in 1965, and 8.96 ha. in 1970.

1. Structure of Farm Households by Size of Cultivated Land

The area of cultivated land under the management of farm households has been on the decrease since 1960. As the size of the decrease in the number of farm households exceeds the percentage of the decrease in the area of cultivated land under the management of farm households, the average area of cultivated land per farm household has increased - i.e., 6.86 ha. in 1960, 10.61 ha. in 1965, and 8.96 ha. in 1970.

1. Structure of Farm Households by Size of Cultivated Land

The area of cultivated land under the management of farm households has been on the decrease since 1960. As the size of the decrease in the number of farm households exceeds the percentage of the decrease in the area of cultivated land under the management of farm households, the average area of cultivated land per farm household has increased - i.e., 6.86 ha. in 1960, 10.61 ha. in 1965, and 8.96 ha. in 1970.

1. Structure of Farm Households by Size of Cultivated Land

The area of cultivated land under the management of farm households has been on the decrease since 1960. As the size of the decrease in the number of farm households exceeds the percentage of the decrease in the area of cultivated land under the management of farm households, the average area of cultivated land per farm household has increased - i.e., 6.86 ha. in 1960, 10.61 ha. in 1965, and 8.96 ha. in 1970.

1. Structure of Farm Households by Size of Cultivated Land

The area of cultivated land under the management of farm households has been on the decrease since 1960. As the size of the decrease in the number of farm households exceeds the percentage of the decrease in the area of cultivated land under the management of farm households, the average area of cultivated land per farm household has increased - i.e., 6.86 ha. in 1960, 10.61 ha. in 1965, and 8.96 ha. in 1970.

1. Structure of Farm Households by Size of Cultivated Land

The area of cultivated land under the management of farm households has been on the decrease since 1960. As the size of the decrease in the number of farm households exceeds the percentage of the decrease in the area of cultivated land under the management of farm households, the average area of cultivated land per farm household has increased - i.e., 6.86 ha. in 1960, 10.61 ha. in 1965, and 8.96 ha. in 1970.

1. Structure of Farm Households by Size of Cultivated Land

The area of cultivated land under the management of farm households has been on the decrease since 1960. As the size of the decrease in the number of farm households exceeds the percentage of the decrease in the area of cultivated land under the management of farm households, the average area of cultivated land per farm household has increased - i.e., 6.86 ha. in 1960, 10.61 ha. in 1965, and 8.96 ha. in 1970.

1. Structure of Farm Households by Size of Cultivated Land

The area of cultivated land under the management of farm households has been on the decrease since 1960. As the size of the decrease in the number of farm households exceeds the percentage of the decrease in the area of cultivated land under the management of farm households, the average area of cultivated land per farm household has increased - i.e., 6.86 ha. in 1960, 10.61 ha. in 1965, and 8.96 ha. in 1970.

1. Structure of Farm Households by Size of Cultivated Land

The area of cultivated land under the management of farm households has been on the decrease since 1960. As the size of the decrease in the number of farm households exceeds the percentage of the decrease in the area of cultivated land under the management of farm households, the average area of cultivated land per farm household has increased - i.e., 6.86 ha. in 1960, 10.61 ha. in 1965, and 8.96 ha. in 1970.

1. Structure of Farm Households by Size of Cultivated Land

The area of cultivated land under the management of farm households has been on the decrease since 1960. As the size of the decrease in the number of farm households exceeds the percentage of the decrease in the area of cultivated land under the management of farm households, the average area of cultivated land per farm household has increased - i.e., 6.86 ha. in 1960, 10.61 ha. in 1965, and 8.96 ha. in 1970.

1. Structure of Farm Households by Size of Cultivated Land

The area of cultivated land under the management of farm households has been on the decrease since 1960. As the size of the decrease in the number of farm households exceeds the percentage of the decrease in the area of cultivated land under the management of farm households, the average area of cultivated land per farm household has increased - i.e., 6.86 ha. in 1960, 10.61 ha. in 1965, and 8.96 ha. in 1970.

1. Structure of Farm Households by Size of Cultivated Land

The area of cultivated land under the management of farm households has been on the decrease since 1960. As the size of the decrease in the number of farm households exceeds the percentage of the decrease in the area of cultivated land under the management of farm households, the average area of cultivated land per farm household has increased - i.e., 6.86 ha. in 1960, 10.61 ha. in 1965, and 8.96 ha. in 1970.

1. Structure of Farm Households by Size of Cultivated Land

The area of cultivated land under the management of farm households has been on the decrease since 1960. As the size of the decrease in the number of farm households exceeds the percentage of the decrease in the area of cultivated land under the management of farm households, the average area of cultivated land per farm household has increased - i.e., 6.86 ha. in 1960, 10.61 ha. in 1965, and 8.96 ha. in 1970.
