1. Income and Expenditures Per Worker's Household

The monthly average total receipts per worker's household during the three months from September to November, 1969 was $1,915.00, of which the monthly average net income per worker's household during the same period was $830.00.

Of the monthly income groups, the household income accounted for more than 50% of the total receipts. In the monthly income group with less than $400,000, the employment income accounted for 70.5%; in the monthly income group with $400,000 to $600,000, the employment income accounted for 70.5%; and in the monthly income groups with $600,000 to $800,000, the employment income accounted for 70.5%.

The ratio of the household income to the employment income was 1:1, which was the largest, for the lowest income group with less than $400,000, and 0.28% for the monthly income group with $800,000 to $1,000,000. The income group with $600,000 to $800,000, for the monthly income group with $800,000 to $1,000,000 and 70.5%, for the monthly income group with $1,000,000 and over.

When employment income is viewed by profession, a conspicuous difference by area is found particularly in the monthly income group of $1,000,000 and over. The monthly average total direct income per worker's household during the three months from September to November, 1969 was $1,915.00, of which the monthly average net income per worker's household during the same period was $770.00, and the monthly average net income per worker's household during the same period was $770.00.

Of the monthly income groups, the household income accounted for more than 50% of the total direct incomes. In the monthly income group with less than $400,000, the living expenditures accounted for 72%; in the monthly income group with $400,000 to $600,000, the living expenditures accounted for 72%; in the monthly income group with $600,000 to $800,000, the living expenditures accounted for 72%; in the monthly income group with $800,000 to $1,000,000, the living expenditures accounted for 72%; in the monthly income group of $1,000,000 and over, the living expenditures accounted for 72%.

The percentages of living expenditures for all the groups except the monthly income group with $1,000,000 and over were high in such prefectures as Tokyo, Osaka, and Kyoto. The monthly average income per worker's household during the period of 1964-1969 was $1,915.00, which accounted for 83% of the monthly income. The household income per worker's household was $1,915.00, which accounted for 83% of the monthly income. The household income per worker's household was $1,915.00, which accounted for 83% of the monthly income. The household income per worker's household was $1,915.00, which accounted for 83% of the monthly income. The household income per worker's household was $1,915.00, which accounted for 83% of the monthly income. The household income per worker's household was $1,915.00, which accounted for 83% of the monthly income. The household income per worker's household was $1,915.00, which accounted for 83% of the monthly income. The household income per worker's household was $1,915.00, which accounted for 83% of the monthly income. The household income per worker's household was $1,915.00, which accounted for 83% of the monthly income.

The percentage of the non-wage income to the total income was as follows: $1,915.00, which accounted for 83% of the monthly income. The household income per worker's household was $1,915.00, which accounted for 83% of the monthly income. The household income per worker's household was $1,915.00, which accounted for 83% of the monthly income. The household income per worker's household was $1,915.00, which accounted for 83% of the monthly income.

2. Amount of Savings and Liabilities Per Worker's Household

The amount of savings per worker's household at the end of November, 1969 was $1,915.00, which accounted for 83% of the monthly income. The household income per worker's household was $1,915.00, which accounted for 83% of the monthly income. The household income per worker's household was $1,915.00, which accounted for 83% of the monthly income. The household income per worker's household was $1,915.00, which accounted for 83% of the monthly income.

The percentage of savings to the total income is as follows: $1,915.00, which accounted for 83% of the monthly income. The household income per worker's household was $1,915.00, which accounted for 83% of the monthly income. The household income per worker's household was $1,915.00, which accounted for 83% of the monthly income. The household income per worker's household was $1,915.00, which accounted for 83% of the monthly income. The household income per worker's household was $1,915.00, which accounted for 83% of the monthly income. The household income per worker's household was $1,915.00, which accounted for 83% of the monthly income. The household income per worker's household was $1,915.00, which accounted for 83% of the monthly income. The household income per worker's household was $1,915.00, which accounted for 83% of the monthly income. The household income per worker's household was $1,915.00, which accounted for 83% of the monthly income.

The percentage of savings to the total income is as follows: $1,915.00, which accounted for 83% of the monthly income. The household income per worker's household was $1,915.00, which accounted for 83% of the monthly income. The household income per worker's household was $1,915.00, which accounted for 83% of the monthly income. The household income per worker's household was $1,915.00, which accounted for 83% of the monthly income. The household income per worker's household was $1,915.00, which accounted for 83% of the monthly income. The household income per worker's household was $1,915.00, which accounted for 83% of the monthly income. The household income per worker's household was $1,915.00, which accounted for 83% of the monthly income. The household income per worker's household was $1,915.00, which accounted for 83% of the monthly income. The household income per worker's household was $1,915.00, which accounted for 83% of the monthly income.
