5. Factories for Fabricated Metal Products Industries

The number of factories for manufacturing metal products was 62.055 as of December 31, 1980.

Classified by the number of workers, there were 26.428 factories with 1-3 workers; 31.369 factories with 4-9 workers; 12.723 factories with 10-29 workers; 1.266 factories with 30-49 workers; 251 factories with 50-99 workers; 32 factories with 100-499 workers; 12 factories with 500-999 workers; and 39 factories with 1,000 workers or more.

6. Factories for Machinery and Accessories Industries

The number of factories for manufacturing machinery and accessories was 72.227 as of December 31, 1980, including 25 for manufacturing machinery.

Classified by the number of workers, there were 18.398 factories with 1-3 workers; 10.006 factories with 4-9 workers; 21.576 factories with 10-29 workers; 14.214 factories with 30-49 workers; 11.425 factories with 50-99 workers; 130 factories with 100-499 workers; 115 factories with 500-999 workers; and 98 factories with 1,000 workers or more.

The proportion of factories with 100 workers or more to the total for all such factories, regarding the number of factories, the number of workers and the value of product shipments were 32.1%, 22.3%, and 21.9%, respectively.

6. Factories for Electrical Machinery, Equipment and Supplies Industries

The number of factories for manufacturing electrical machinery, equipment and supplies was 62.055 as of December 31, 1980.

Classified by the number of workers, there were 26.428 factories with 1-3 workers; 31.369 factories with 4-9 workers; 12.723 factories with 10-29 workers; 1.266 factories with 30-49 workers; 251 factories with 50-99 workers; 32 factories with 100-499 workers; 12 factories with 500-999 workers; and 39 factories with 1,000 workers or more.

Classified by prefecture, Osaka had the largest number of factories with 1,389, followed by Aichi with 1,290, Aki with 1,278, Fukuoka with 1,286, and Nagoya with 1,477.

The proportion of factories with 100 workers or more to the total for all such factories, regarding the number of factories, the number of workers and the value of product shipments were 21.9%, 14.4%, and 61.4%, respectively.

6. Factories for Precision Instruments Industries

The number of factories for manufacturing precision instruments was 13,989 as of December 31, 1980.

Classified by the number of workers, there were 4,255 factories with 1-3 workers; 3,881 factories with 4-9 workers; 2,339 factories with 10-29 workers; 1,636 factories with 30-49 workers; 219 factories with 50-99 workers; 18 factories with 100-499 workers; 22 factories with 500-999 workers; and 17 factories with 1,000 workers or more.

Classified by prefecture, Osaka had the largest number of factories with 1,368, followed by Niigata with 1,226, Fukuoka with 1,223, Osaka with 715, and Hokkaido with 755.

The proportion of the factories with 100 workers or more to the total for all such factories, regarding the number of factories, the number of workers and the value of product shipments were 26.8%, 18.7%, and 60.8%, respectively.

DISTRIBUTION OF FACTORIES

NUMBER OF WORKING

(Attributes symbols are used for cities which have numerical factories, and the number of factories is shown numerically):

- 200-499 persons
- 500-999 persons
- 1,000 persons and over

Symbols on map:
- Attribute symbols
- City names

Scale as of December 31, 1986

1:4,000,000
